For the reason, however, that in the instances of previous offers extensions o time have been made from mouth to mouth, continuing the advantages given, it is right, and indeed necessary, that the statement should be made now quite as prominently and emphatically as the plan teelf to given, that this offer of Two will not be continued after the presen-month. MONTHS FREE,

No misunderstanding will be permitted regarding this offer.
There is no increasing of the requiar rate of \$3 a month for paid months to offset the apparent liberality of the free months.
These points are plainly stated:
(1) The offer conceals no scheme to raise the requiar rate of \$1 a month for paid months to relieve the physicians from the expense of the proffered free months; \$3 a month will be all that will be charged by these physicians at any time.

that will be charged by these physicians at any time.

(2) The offer is not confined to any one class of disease. It covers all diseases. It makes no difference what is the matter with you—you have a right to avail yourself of it, providing you do so before July I.

(3) It is not confined to new patients. It refers to old patients renewing treatment as well as to new patients, It refers to all who begin for renew the treatment during the remaining days of June.

(4) It is simply restricted as to time. Of course such an offer cannot be indefinitely extended. It is confined to those who apply before July 1. This is the only limitation.

Evening World" in New York. There are only a few padrones in Brooklyn, however, and for this reason it is believed they might easily be weeded out were it not for the political protection they receive. The interpreters are the agents of the padrones.

Corporation Counsel McDonald is to decide what method of investigation shall be pursued, and it may come under the jurisdiction of the Aldermanic Committee now investigating the city-departments, in which case nothing2may ever come of it.

That there is a scandal revealed by Lawyer Corrao's letter nobody who has business in a police court doubts.

If a thorough investigation is made it may be shown how naturalization papers are disposed of among Italians in Brooklyn.

It may also be shown what police justices aid interpreters who are accused of mulcting their countrymen in the courts.

Perhaps some of the more advanced schools of women, says the Lady's Pictorial, may care to become colonists of the new settlement in Calabria, which is about othe founded by an Italian Deputy. There will be perfect equality between the sexes, and the great dress question has been decided beforehand. Men and women are to wear similar attire, and apparently to work without any distinction of sex. It will be interesting to learn in a few years' time whitether these "emancipated" women are satisfied, whether they are still on an equality with man, or whether they have completely out-distanced the other sex.
